

## Ulkonsola application Support

Application *Ulkonsola* (Mobile) allows to monitor the server of the ULmonitor main console. It shows only the parameters from Radio loggers and apiary scale. The application can be downloaded from [www.ulmonitor.pl](http://www.ulmonitor.pl) or Google Play.

After installation and commissioning, enter in the first white field obtained login (received at ordering equipment ) and password to fields below.

Then press the button "**Login**" and on the next screen ("Step #2") without typing anything the "**Next**" button. If you just want to test the system, you can enter:

**login:** pasiekapoznan@ulmonitor.pl

**password:** ulmonitor

and view current parameters (weight, temperature, humidity) taken from the hives in our test apiary.
